u.bot

How to use u.bot

A step-by-step guide: sign up and get the most out of your assistant.

Photos | Images | Documents | Code

OVERVIEW

Welcome to u.bot

u.bot is an AI assistant that can read your photos, draw images, build apps and write documents you can download. This guide walks you through creating an account and using each part of the app.

What it does	Example
Photos — understands pictures you upload	Snap your fridge and ask what to cook.
Images — draws pictures for you	"Draw a cartoon cat astronaut."
Documents — writes files you can download	Turn rough notes into a tidy PDF.
Code — builds and previews apps (U-Code)	"Build a simple to-do list app."

Contents

1. Create your account 2. Verify your email 3. The home screen 4. Choosing a mode

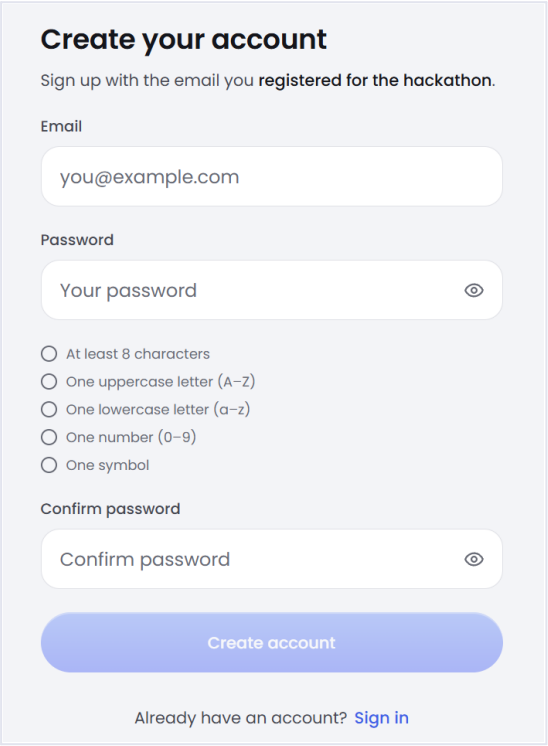

> **Before you start**
> Have the email address you registered for the hackathon ready — you will need to sign up with that exact address, and you will need access to its inbox to receive a confirmation code.

STEP 1

Create your account

On the sign-in page, click **Create an account** at the bottom of the form.

1. **Enter your email**
   Use the email you registered for the hackathon.
2. **Choose a password**
   Watch the checklist under the field — each circle fills in as a rule is met.
3. **Confirm the password**
   Type it again exactly. Use the eye icon to show/hide what you typed.
4. **Click “Create account”**
   The button becomes active once everything is valid.

The “Create your account” form

Password rules

- At least 8 characters
- One uppercase letter (A–Z)
- One lowercase letter (a–z)
- One number (0–9)
- One symbol (e.g. ! @ # $)

Example of a valid password: **Sunny-Day42**

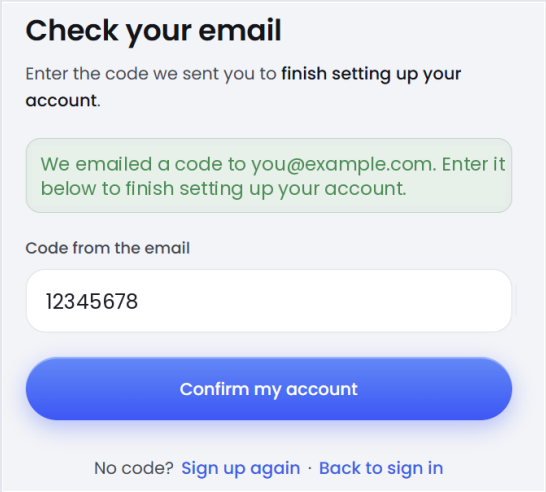

STEP 2

Verify your email

After you click Create account, u.bot sends a code to your inbox. You need it to finish setting up.

1. **Open your email**
   Look for the message from u.bot. Check Spam/Junk if it is not in your inbox.
2. **Copy the code**
   It is a short number, for example 12345678.
3. **Paste it into "Code from the email"**
   Make sure there are no extra spaces.
4. **Click "Confirm my account"**
   You are taken into the app, ready to chat.

Didn't get a code?
Please **contact a staff member** and they will help you get set up.

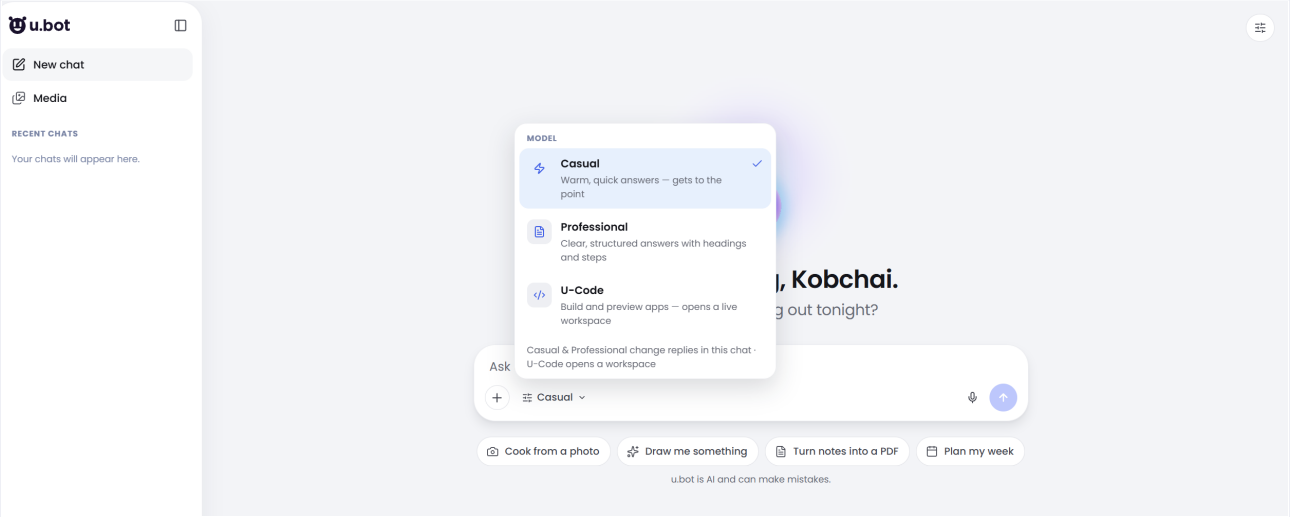

The "Check your email" screen

STEP 3

Get to know the home screen

This is where every conversation starts.

The u.bot home screen (shown with the mode menu open)

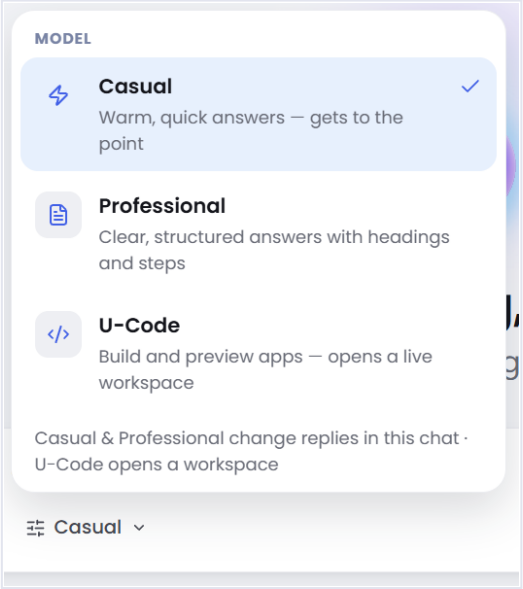

Area	What it does
New chat	Starts a fresh conversation.
Media	Your library of photos and images used or created in chats.
Recent chats	Your past conversations — click one to continue it.
Sidebar toggle (top-left icon)	Hides or shows the sidebar for more space.
Message box	Type your question or request here.
+ button	Add a photo or file to your message.
Mode picker (e.g. “Casual”)	Choose how u.bot answers — see Step 4.
Microphone	Speak your message instead of typing.
Send (arrow button)	Sends your message. It lights up once you have typed something.
Your profile (bottom-left)	Shows your name and email. The arrow icon next to it signs you out.

STEP 4

Choose a mode

Click the mode button under the message box (it shows the current mode, e.g. **Casual**) to open the **Model** menu. The selected mode has a check mark.

Mode	Best for
Casual	Warm, quick answers that get to the point. Great for everyday questions and chatting. (Default)
Professional	Clear, structured answers with headings and steps. Great for work, study, guides and plans.
U-Code	Building and previewing apps. Opens a live workspace where you can see your app running.

The Model menu

Good to know
Casual and **Professional** only change the style of replies in your current chat — you can switch any time. **U-Code** is different: it opens a separate workspace for building.

Which mode should I pick?

If you want to…	Use
Ask a quick question or get a recipe idea	Casual
Get a step-by-step plan, report or study notes	Professional
Make a website, game, calculator or other app	U-Code
